SUMMARY OF KEY QUALIFICATIONS

- Full Stack Engineer with 4+ years shipping production web apps across e-commerce, edtech, legal tech, and logistics – proficient in React/TypeScript frontends and Node.js/Django backends.
- Proven track record leading systems architectures, designing reusable component libraries, and mentoring engineers across distributed remote teams.
- Delivers features end-to-end – from client discovery through CI/CD deployment – using Docker, GitHub Actions, and PostgreSQL on GCP and Digital Ocean.

EDUCATION

University of Rwanda – Kigali, Rwanda

Graduated: 2024

Bachelor of Science in Computer Science

- Programming Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Software Engineering, Web Design, Object-Oriented Programming, Distributed Systems, Artificial Intelligence, Cloud Computing

EXPERIENCE

A2SV (Africa to Silicon Valley) – Backend Software Engineer | Kigali, Rwanda

Jan 2026 – May 2026

- Reduced hot-path API response times by architecting PostgreSQL indexing and query-tuning strategies across production services serving multiple regions.
- Improved deployment reliability by implementing comprehensive unit and integration test suites and maintaining CI/CD pipelines for fast, repeatable releases.
- Elevated team engineering standards by leading code reviews and mentoring junior engineers, raising pull-request quality metrics across the team.

Utilized: Node.js, PostgreSQL, GCP (Google Cloud Platform), CI/CD

Smart Class Rwanda – Full Stack Software Engineer | Remote

Nov 2024 – Oct 2025

- Accelerated dashboard delivery by 30% by building a reusable React/TypeScript component library that enforced UI consistency across 4+ client-facing products.
- Cut deployment time and eliminated release-day incidents by setting up GitHub Actions CI/CD pipelines and containerized deployments to Digital Ocean via Docker Compose.
- Owned features end-to-end for e-learning clients – translating complex business requirements into technical specs and managing relationships from discovery through production.

Utilized: React, TypeScript, Django, PostgreSQL, Docker, Digital Ocean

Imperium Ltd. – Software Developer (Full Stack) | Kigali, Rwanda (Hybrid)

Jul 2022 – Aug 2023

- Delivered full-stack solutions across multiple client industries simultaneously, building React frontends and REST APIs consumed by several production web applications.
- Improved codebase consistency and surfaced performance bottlenecks by conducting structured code reviews across concurrent client projects.

Utilized: React, Node.js, REST APIs, CI/CD, GitHub Actions, Agile, cross-functional collaboration

Solvit Africa – Backend Developer Intern – Team Lead | Kigali, Rwanda

Feb 2023 – Jun 2023

- Delivered all sprint milestones on time by coordinating task distribution across the team as team lead, establishing authentication and error-handling patterns adopted as team standards.

Utilized: Node.js, Express, REST APIs, code reviews, team coordination

SKILLS

Languages: TypeScript, JavaScript, Python, Go (growing)

Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Webpack, Vite

Backend: Node.js, Express.js, NestJS, Django, REST APIs, WebSockets

Cloud & Serverless: AWS (Lambda, API Gateway, DynamoDB), Serverless Framework, Serverless Architecture, GCP (Google Cloud Platform), Digital Ocean

Databases & ORMs: PostgreSQL, MySQL, MongoDB, Sequelize, Prisma, Mongoose

DevOps & Tooling: Docker, Docker Compose, GitHub Actions (CI/CD), Git, Swagger/OpenAPI

Testing & Practices: Jest, Supertest, Unit & Integration Testing, Agile/Scrum, Code Reviews, Mentorship
